DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 21-24, drawn to a bonding method, classified in class 156, subclass 196.
 - II. Claims 17-20, drawn to a bonding apparatus, classified in class 156, subclass 583.1.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus such as one without a holding device. Further, the apparatus as claimed can be used to practice another and materially different process such as the heating of a preselected portion of a single sheet.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1733

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

If Group I is elected the following species election is required:

Species:

Species I, Figures 2-5C, 7, and 10 (appears to read on claims 1-16) drawn to bonding a plurality of sheets together.

Species II, Figure 11 (appears to read on claims 21-24) drawn to bonding a single sheet.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

If Group I, Species I is elected the following sub-species elections are required:

Sub-Species I-I:

Sub-Species I-I-A, Figure 9A (appears to read on claim 4) drawn to a plurality of sheets substantially fused to one another.

Sub-Species I-I-B, Figure 9B (appears to read on claim 5) drawn to a plurality of sheets partially fused to one another.

Sub-Species I-II:

Sub-Species I-II-A, (appears to read on claim 14) drawn to a binding a first and second sheet into a sub-stack prior to binding a third sheet to the first and second sheets.

Sub-Species I-II-B, (appears to read on claim 15) drawn to a binding first, second, and third sheets simultaneously.

Art Unit: 1733

Applicant is required under 35 U.S.C. 121 to elect a single disclosed sub-species, from Sub-Species I-I and I-II, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3, 6-13, and 16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was made to Matthew Wade on 9/29/03 to request an oral election to the above restriction requirement, but the examiner was unable to reach him.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1733

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **John L. Goff** whose telephone number is **703-305-7481**. The examiner can normally be reached on M-Th (8 - 5) and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on 703-308-2058. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
